A Guide To Going Beyond The Law Of Attraction

THE
12 UNIVERSAL LAWS
THAT GOVERN EVERY MANIFESTATION BABE
You've probably heard of the Law of Attraction especially if you're now familiar with Manifestation Babe teachings. But did you know that there are 11 other laws that govern the way that this Universe works? Most commonly known as the "Twelve Immutable Laws of the Universe," each law beautifully coexists with the Law of Attraction to create a bigger picture.

In the best-selling movie, "The Secret," we are led to believe that in order to receive everything we want in life we must only want it and visualize it. That would be correct IF that were the only universal law to exist. The 11 other laws will explain why in order to be a powerful manifestor, you must get your booty off the couch and take inspired action. And if you still don't receive what you want? There's a universal law that reminds you to be patient.

Use this guide as a quick look into the 12 laws. It has been argued that there are more than 100 laws that govern the way that the Universe exists, evolves, and operates. However, it is insightful enough to just get familiar with the 12. If you want to dig even deeper into this subject, check out my masterclass where teach you how to manifest with the 12 laws in depth.
WHAT ARE THE 12 LAWS?

THE LAW OF ONENESS
THE LAW OF VIBRATION
THE LAW OF ACTION
THE LAW OF CORRESPONDENCE
THE LAW OF CAUSE & EFFECT
THE LAW OF ATTRACTION
THE LAW OF PERPETUAL TRANSMUTATION OF ENERGY
THE LAW OF COMPENSATION
THE LAW OF RELATIVITY
THE LAW OF POLARITY
THE LAW OF RYTHM
THE LAW OF GENDER
THE LAW OF ONENESS:

The Law of Oneness states that we are all ONE and that we are all ONE with God. There is no difference between you and me and there is no difference between you or I and God. We all have the power within us to create magic. Ultimately, this law states that what you do to someone else, you ultimately do to yourself. If you find yourself gossiping, or treating someone with disrespect, you may as well be doing the same to yourself -- because energetically you are. This can be summarized as "what you wish upon others, you wish upon yourself." Celebrate people when they are manifesting what you want, because if they can have it... so can you!

THE LAW OF VIBRATION:

Everything has a vibration and everything is energy. When you look at solid objects (including yourself) under a high powered microscope, you will find that everything is composed of atoms. Those atoms are vibrating and those vibrations are emitting an frequency, creating an energetic field. Whether you physically see it or not, you are just one big ball of energy. **In order to manifest what you want, you must become a vibrational match to the thing, person, experience, or circumstance by aligning with it.** You align with it by feeling really good about having it. Because our emotions are vibrations, this is the fastest way to become an energetic match to the thing we want. Once we become an energetic match, we have accessed the powerful Law of Vibration.

THE LAW OF ACTION:

So many spiritual teachers miss the Law of Action. However, because it's a
physical law that governs the way we manifest, by ignoring it, we create resistance. The Law of Action states that we must take physical action in order to create the physical manifestation of what we want. We can visualize, dream, chant, and meditate all we want. In fact, these are great tools for taking spiritual action! However, the law refers to physical action. *When you actually DO something that relates to what you’re manifesting, it will manifest that much faster.* This isn't to say that you must take ANY action. Inspired action trumps random action any day. Pay attention to nudges from the Universe about your next step.

**THE LAW OF CORRESPONDENCE:**

The Law of Correspondence states that your outer world will only reflect your inner world. *Everything is a reflection.* In order to change something on the outside, we must first change it on the inside. We will never be able to force anything or make massive shifts by physically trying to change something. We must first change our perception and perspective of it to see it differently. Once we see it differently, we can begin to view it from a more empowering place. If you find yourself stuck, start by practicing forgiveness. Forgive yourself and forgive others to change your internal state. Then, put on an inspirational audio or video, read a good book, or journal out some of your frustrations or worries. It’s only what happens in the mind that will be reflected in your reality, so whenever you get frustrated with your manifestations, ask yourself what you can do differently inside to create a different reflection.

**THE LAW OF CAUSE & EFFECT:**

Also known as Karma, the Law of Cause and Effect states that what you sow you will reap. Remember that whatever seed you plant into the ground
doesn't matter. The ground (or soil) itself doesn't care. It will grow whatever was planted with no judgments or preferences on what it would rather grow. If you are unsatisfied with what you're reaping, perhaps it's time to check in on your seeds. What are you planting into the ground? Are they positive thoughts or thoughts or worry? Are you planting seeds of pain, jealousy, envy, and ill-wishes for someone else? Knowing that **whatever you sow you will reap**, make sure you're focusing on the harvest that you WANT, not the one that you don't want.

## THE LAW OF ATTRACTION:

The most common law in the world of manifestation. The Law of Attraction simply states that "like attracts like." Similarly to the Law of Cause and Effect, the Universe doesn't care what energy you put out into the world. It will only return that same energy back to you with no judgments and no preferences. Positive energy will attract positive energy and negative energy will attract negative energy. If your reality is filled with things that you currently don't want, it doesn't mean you're a bad person or don't deserve better. It's a chance for you to check in and see what kind of energy you're sending out into the Universe. Check with your thoughts, feelings, and actions... are they mostly positive? Or are they mostly negative? Wherever they are on the spectrum, this is a great preview to what you're currently attracting into your life by Law of Attraction.

## THE LAW OF PERPETUAL TRANS MUTATION OF ENERGY:

This law is a mouthful but such a great one when it comes to how much power we truly have. The Law of Perpetual Transmutation reminds us that
we have the power to change our life as soon as we decide to change it. Nothing is static and everything is always transforming. We can transmute negative energy into positive energy and we can create (or manifest) things out of NOTHING. The law also reminds us that high vibration energy will consume low vibration energy, so never worry about others' low vibe bringing you down. It is only your fear and perception that they will that actually does. Keep focusing on your energy and you'll be able to inspire others as a benefit.

**THE LAW OF COMPENSATION:**

This law of similar to the Law of Cause and Effect, but this law refers to receiving gifts, blessings, and monetary rewards. The Law of Compensation reminds us to *give what we want, to receive freely and to give it without expectations*. Having high expectations and a lack of appreciation is one of the biggest ways we resist our blessings. This law also reminds us that we are more than allowed to be highly compensated for spiritual work as those who bring others closer to their channels of abundance, peace, success, and fulfillment will be greatly blessed in return.

**THE LAW OF RELATIVITY:**

The Law of Relativity states that every single soul on this planet will face challenges from time to time. However, the degree of challenge is relative and nothing is ever as bad as it seems. This law reminds us to keep our perspective in check. *Life is always happening for us and not to us*, so judging our challenges only make us feel less empowered to get through them. We must understand that any obstacles, challenges or "problems" that we face were divinely planned for us to make us stronger, better, and help us evolve into the best versions of ourselves.
THE LAW OF POLARITY:

The Law of Polarity states that every single thing in this Universe has its polar opposite. Joy has sadness, light has dark, and up has down. Many get frustrated with the fact that polar opposites exist, but the Universe does this to serve us. We will get what we don't want in order to have even more clarity on what we do want, and actually appreciate it when we receive it. It's hard to truly be grateful for joy when we have never before felt sadness. It's hard to appreciate the beautiful sunlight when we've never experienced darkness. Polarity exists so that we can exercise our focus. Just like a muscle, focus requires persistent practice in order to strengthen it. By having polar opposites, we get really good at focusing on what we do want rather than what we don't want.

THE LAW OF RHYTHM:

The Law of Rhythm reminds us that nature is seasonal and cyclical. Since we are innately a part of nature, we too have seasons and natural rhythms. We must only work when we feel inspired to put in the work, and rest when we feel inspired to rest. Just like we can't expect 365 days of summer, we can't expect to be energized, happy, and productive every single day of the year. Winter comes around every year to give us a break; To nurture our souls; and to rejuvenate our spirits. This is also to say that we can't expect 365 days of winter either. Trust that the inspiration will come back once you've had your rest.

THE LAW OF GENDER:

The Law of Gender states that everything has both a masculine and feminine energy. The two energies of action (masculine) and allowing
(feminine) coexist and we must find the balance between the two. Manifesting the life of our dreams requires us to dance between patience (feminine) and persistence (masculine). Embodying just one or the other will either lead us going nowhere, or pushing so hard that we are left frustrated and exhausted. When we find the balance, we are both taking inspired action AND receiving all of our desires. This is the sweet spot of manifestation.
