

Episode #106. Where Does Money Come From?

Hello Gorgeous Souls!

Welcome back to the Manifestation Babe Podcast!

I am having an incredible Sunday after celebrating my grandpa's birthday and I decided to sit down and record a podcast. I need to get a couple things done today before heading out to Palm Springs tomorrow for an executive team meeting. My executive team, Brennan, our Integrator, and I, are heading out to Palm Springs to do some quarterly planning for our business. This is something that we started to implement this year and our last meeting was actually in Bali, before our retreat, and it was a great meeting!

If you're a business owner and you have a team, or at least you're serious about building a team, building a structure and building a business, our Bible has been the book Traction! The author is Gino Wickman and you can find it on Amazon! It's about 250 pages long and it's a step by step book on how to build an organizational structure in your business and it's made such a difference for my business in just four months. It's been mind blowing!

Our numbers are increasing and our team has this amazing synergy between us all that hasn't quite existed to this degree before we implemented Traction. We now have consistency and feel like a legit business. And I know I say legit business as if it wasn't a legit business before, but this time we have Monday meetings every single Monday, there's executive meetings, there's just so much awesome stuff going on and I highly, highly, highly recommend this book!

Anyway, tomorrow is our executive meeting and pretty much this week is all team stuff, so I won't have an opportunity to record any podcasts at all, so I decided to pop another one out just so that you have something to listen to! Especially since today I'm going to be talking about money and specifically where money comes from. Now, I know you're all money fans and if you're not a money fan, ask yourself why you're not and why you don't have that kind of relationship with money. It is your relationship with money and what money means to you that determines how much of it you manifest into your life. For me, money is a very important relationship and it's something that I value, honor, and respect.

That's why my bank account keeps growing and why when anyone who enrolls in Rich Babe Academy or even something as simple as Unleash Your Inner Money Babe, (my book on Amazon), gets amazing results because it's not just about affirmations and not just about wishing money into your life. It's about rebuilding that relationship with money and seeing it as a very valuable relationship in your life. Just like you would see your relationship with your husband, or your relationship with your kids, or your parents, or any other important relationship in your life. When you treat your relationship with money as important as your relationship with your spouse, things are going to change. It completely shifts the energy, and so that's why I love teaching on money and why I love talking about it. That's why I always experienced an abundance of it and that's why my students experience an abundance of it, because we put the work in. The energetic work, the subconscious work, and the relationship work.

This is why I wanted to bring in another episode on money because I know you have the most amount of questions about money and you get most excited about it as well!

There is a big misconception around money. The reason why I want to talk about where money comes from and why this topic is speaking to me right now, is because I see a lot of people, especially people who have 9-5 jobs or people who are just starting their businesses, struggle with money manifestation. I've found it really comes down to this belief, or this misconception, that money is only manifested if you own a business.

For instance, someone is working a 9-5 job where they have a boss or they have a salary, and they believe they can't manifest money because they have a fixed income. And I also see a lot of people who work 9-5 jobs who love their jobs, who don't have any interest in becoming entrepreneurs, who don't have any interest in being business owners, but they really struggle with this concept that money can't be manifested because it comes from someone else.

"My money comes from my boss, my money comes from the company that I work for."

Another thing, and I especially see this from people who are employees, is they believe the only way to manifest money is if they have a business, because in a business, there is no limit to money.

So every single person who's in business is supposedly "automatically successful" because that's the only way to manifest money. I always remind those people, when I answer their DM's or when I see their question pop up in my email inbox, that there's no guarantee when you have a business. There's no guarantee that someone's going to buy your product, so energy work is involved regardless. Whether you have a "fixed income" or a "not fixed income", there is still no guarantee that the money's going to come your way. You still need to be doing this energy work, this vibrational work, and this money manifestation work, in order to manifest more money.

When it comes to a business, most people who are business owners, think that money comes from other people. Someone has to come and buy the product. People who are working 9-5 jobs, also believe their money comes from another person. They believe it comes from their boss, the company, or the pension, and the thing is, that money DOES NOT come from other people.

That is the biggest misconception. Money flows **through** people. Because let me tell you, we're on this planet with each other, and so we're constantly giving and receiving energy with each other. We're constantly creating energy with each other and so, of course, other people are involved. There's 8 billion of us together on this planet and other people are involved when it comes to money, but money does not **come** from the other people.

A lot of people conventionally will say that money is printed by the government or it's something that your boss gives to you, something that your customers give to you. It's not about that.

Money, really comes from **Source**. It comes from **energy**. It comes from the **divine**.

If you think about it, money is just energy. We look at money, most of the time, as something that is paper in our wallet or a number in our bank account, but I want to share an interesting fact with you that I discovered actually the other day. I read this on the Internet and I thought it was fascinating because it goes to show that money literally does not exist.

I know you hear this from Law of Attraction teachers, Manifestation teachers, energy teachers, and we always say that money doesn't exist, it's just energy. But I want to give you an actual fact that you can Google, just to see that it doesn't exist.

The fact is, that only 8% of the global money supply exists in physical form.

So physical form meaning let's say paper or gold, ONLY 8% exists in physical form,. So where is the other 92%? It is all electronic. So that's when you go on your computer and you type in some zeros and ones, and you look at your bank account, which is again generated by software, zeros and ones, and you see a number in your bank account. It's still electronic.

So then what is electricity?

If you think about it, electricity is vibration. Electricity is waves. Electricity is frequency. Electricity is energy. If money is energy, where does energy originate? **We are all energy.** We're all just a bunch of vibrating atoms. You and me right now, including the device you're reading this on, are all just waves and frequencies and vibrations being translated. So what your subconscious mind does, is it fills in the gaps and shows you **matter**. You're not going to understand if all of a sudden everything around you is moving and it's just a bunch of energy. You're going to think that you've lost your mind. So your mind will create matter and put the building blocks of energy together so that you have some sort of physical matter to work with, otherwise you would not make sense of the world.

So if money is created, how is it created? It's created by our connection to Source. Where that brings me back to, is **when you have an intention for the amount of money that you believe you are destined to create in your lifetime, when you align vibrationally with money, there is not a single soul in this entire Universe who can prevent you from manifesting that money.** That includes your boss, your business, that includes everything. You and you as an energetic being, and your connection to source, transcends all of it. When you connect vibrationally with money, when you get into alignment with money, when you believe that it's coming your way, when you set your sights on how much you want, and you let go of the how, and all you do, every day is just feel the feelings, as if it's already here, and take action as if it's already here, and become that version of yourself who already has that money, is when the money will flow to you.

What I'm about to explain is very Quantum Physics and I am not a master of Quantum Physics, but I do love to study it. The concept is collapsing timelines. I like to believe that there are a gazillion different parallel Universes and different realities running along all of these timelines all at once. Meaning that there is a version of you out there right now, who is already living the reality that you want. There's another version of you out there on a different timeline. That version of you who, maybe perhaps, didn't make the decisions that you made that got you on this current timeline.

For me, for instance, there's a version of me in a different parallel Universe right now, who didn't decide to break up with her boyfriend, who didn't decide to move back to Los Angeles, who didn't decide to start Manifestation Babe. So just as you can think about it, that there's another version of me out there who's still living in Seattle with her parents and still struggling, or there's a version of me in another parallel Universe that is still applying to Medical School, or got into Medical School and is now graduating. There's all these different versions and what they call it in Quantum Physics is *collapsing the timelines*, meaning

taking the timeline that you desire most, and bringing it to you. Now how you do that on a quantum level is by becoming that energy right now.

When you become that version of yourself who already has that reality, which if this is not sounding familiar, step number two of my manifestation process is how you bring this timeline to yourself, or at least go to that other timeline, but you collapse the two timelines and then you start living that reality. The gap in between when that happens, is as fast as you can get onboard with that **being**.

Let's say that you are currently making \$100,000 and you want to make \$200,000, or you have a business that you're in, which you're currently making \$500,000 and you want to make a \$1 Million. Wherever you are and wherever you want to go, doesn't matter. The concept is still the same. So let's say that I'm in a job right now and I'm making \$80,000 a year and I really desired to make \$150,000 a year. Instead of just saying, "It's all dependent on my boss and he was never going to give me a raise and I'm stuck here forever, and there's no opportunities out there and oh my God," (which is how most people tend to think), instead, you can be a lot more resourceful than that and you can literally write down, or journal, or think about, or contemplate and ask yourself, "The version of myself who's already making \$150,000, how do they get there?"

If you literally put yourself onto that timeline and just ask yourself the right questions, like what kind of value does someone who makes \$150K give out to the world in exchange for that money? Or how do they show up at their job to such a degree, in such a level, that their boss finally notices how valuable they are to the company? Or maybe there's that version of yourself who is making \$150K that had an idea that manifested into almost doubling the salary. The version of yourself who is already making \$150K has a different belief system. It's a different vibration and that's really where the work comes in. That's really that connection to Source. That's how you connect to Source, is you just know that there is an energy out there. I look at it as a loving mother or father in the sky, which supplies all your needs unconditionally, where everything that you need is already given to you and all you have to do is raise your vibration to meet that energy and connect.

So I know this is really "woo woo" today and not so practical, but this is the absolute, at least in my opinion, the absolute truth that money does not come from other people. There's not another soul out there. When I hear "fixed income" or "I have a fixed salary", what I immediately hear from that person is, "I am a fixed soul," and you're not a fixed soul. When I hear, "My business is at a plateau," I immediately hear, "I believe that I'm a plateau," and you're not a plateau.

You are constantly expanding and constantly growing and evolving with the Universe and you get to have as much as you want because it's not your business who's in charge of your income. It's not another person who's in charge of your income. When you align vibrationally with the money that you want to manifest, how I see this is the Universe goes to work for me, in my favor, and inspires people in the right way to buy my courses, to buy my books, to want to work with me one on one, to come to my Bali Retreat, to come to my events. That's how I see it. It's not that I have to force anyone or think that my money is tied to other people. My money is tied to my connection with Source and Source, Universe, God, Angels, however you want to call it, goes out there, on my behalf, and inspires other people to come and want to work with me.

The same thing can happen whether you have a business or if you're working a 9-5, you never freaking know when one day your boss decides to give you a raise because they finally notice what a great job

you've done all year long. I mean, there's so many things that can happen. You never know when you're going to wake up tomorrow with this random idea on how to double the company's profits and you bring it to your boss and present your idea. I kid you not, they're going to want to give you a raise. So you can't just shut yourself down.

You can't just limit yourself because that's what human beings do, right? That's what Egos do. They immediately shut themselves down. They immediately diminish their light because it is apparently "unsafe" to the ego to live in abundance, but your Higher Self knows so much better and your Higher Self has already connected this. All you have to do is tap into the supply.

Even though money seems to come from other people, it only comes through other people. There is nothing, absolutely nothing, that can prevent you from tapping into your divine and birthright abundance. I hope this makes sense to you and it wasn't too "woo woo" and out there because I can get even "wooper" if you want me to! There is no such thing as a fixed income. There is no such thing as a fixed salary. There's no such thing as fixed business growth. So if you're at a plateau right now or you think that you have a fixed salary, remind yourself there's no such thing because Source isn't fixed and you are a Spiritual Being having a human experience. And that's to say that you, as a spiritual being, are fixed or limited, which we all know is not the truth, right?

So I'm curious, are you now taking a sigh of relief? How do you feel right now? Hearing that, how do you feel right now knowing that there's absolutely nothing standing in your way except for your own damn belief system? There's nothing standing in your way except for the way that you choose to think about money. There is no pie in the sky. There is no limit. We can all tap into the limitless abundance supply. Just relax and know that all your needs will be met because that's just who you are. We can always tap into this abundant flow and all it takes is us just getting into the vibration and collapsing that timeline and BOOM, you are living your ultimate reality.

But, here's the danger. If you believe that money is fixed or comes from other people, you will shut down this magic that can occur too. Most of the money that I've created in my business has come from ideas that have popped randomly into my head. I now know it's never been random. I now know that it's my communication with Source, and Source is constantly flowing ideas my way. I am the person who is meant to manifest the ideas that I get, but when you immediately limit yourself and choose to believe otherwise, or choose to believe that you can't manifest money, or something is preventing you from manifesting money, or you're not worthy of it, or you're not deserving of it, then you just shot down that connection and you won't receive the ideas and you will get stuck. And then it will feel like there's a dark cloud around you and that there's absolutely nothing you can do to change your circumstances, and we all know, there's no such thing as a victim. No one's a victim. Everyone can take control of their realities. Everyone can take control and change anything that they don't like about their life, but it starts with you. It starts with awareness and it starts with you. It starts with a different belief system, and because belief drives behavior, that translates into another behavior, which is taking action. Even if the ideas come, you're not going to be motivated to even act on those ideas if you don't have the beliefs to back them up, because truthfully, there's no way.

If you had this belief that you can't do something, how likely are you to try? If you do believe that you can do something, how much more likely are you to get out of bed and feel like you're going to make it happen. You're not just going to try, you're just going to make it happen because you believe that you can do it.

I hope you absolutely loved this episode and I hope I was able to ease your mind when it comes to money manifestation. You are totally in control here babe, everything you've ever desired is at your fingertips, you just have to shift those beliefs!
